King Constantine is improving.
May wheat dropped 8 cents at Chicago Thursday, closing at \$1.42.
Scientists report that the Melish comet, that has been under observation, has broken up.
Ten thousand Italian residents of New York have asked to be sent home for service in the war.
It is getting so warm for the President of Portugal that he has announced his determination to resign.
An Evansville young man has started out to walk to California. The custom is to ride out and walk back.
Marelli announces that he has invented an apparatus that will make a brick wall as transparent as a pane of glass.
The Standard Oil Company, of New York, has announced a reduction of 25 points in refined petroleum in cases for export, making the price \$2.75 per gallon.
Col. Joe A. Fuqua, Steward of Lakeland asylum since 1900, died Wednesday, aged 66 years. One of his daughters is the wife of Senator Beckham.
Forty miners were entombed in a coal mine at Namsino, B. C., Thursday. Sixteen were rescued and two dead bodies found. Others not accounted for yesterday.
Two Zeppelins raided Southend, England, Thursday night, dropping bombs, one of which killed a woman. The same night allied aeroplanes dropped bombs on Ostend, Belgium, killing 50 German soldiers.
Dr. N. A. Palmer says the Prohibition party in its State Convention is not expected to nominate a candidate for governor but the temperance forces will support one of the Democratic candidates. Just how he expects a member of any other party to get into a Democratic primary is not made plain.
Eleven countries of Europe with a population of 273,500,000 are now at war. Ten small countries with 37,500,000 population are not yet involved. These are Spain, Norway, Sweden, Denmark, Holland, Switzerland, Rumania, Bulgaria, Greece and Albania. Several of them are almost sure to be drawn in.
Harry McChesney spoke at Franklin Tuesday and the Favorite says that owing to the fact that the farmers were especially busy only a limited number were in attendance. He also had an appointment at Elkton Wednesday but owing to the rain did not make a speech. It seems hard to enthrone the people about politics this year.
Wm. White, a mulatto prisoner in the Frankfort penitentiary, walked away clad in Guard J. D. Spencer's best blue serge suit and with Capt. Spencer's handsome gold watch and revolver in his pocket, his feet incased in a pair of vic's kid shoes and with a matty blue hat on his head. He feigned sickness and left the other prisoners.
First Christian Church.
"The Open Church" J. Newton Jessup, Pastor. Bible School etc. There were 487 in attendance last Sunday, with 105 in the men's class. New names are added to this class every Sunday. Children's Day will be observed June 6. Christian Endeavor 6:30 p. m. The pastor will preach in the morning on, "The Disciple's Trade-Mark." Evening "Recovered Families."
The Elkton Hailstones.
The Elkton Times bears out the report of hailstones as large as eggs in the storm last Friday. It says some of them actually measured 8 inches in circumference and weighed 5 ounces. Windows and skylights suffered greatly all over the town.

BIGGEST CARDS TO PLAY YET

Senator LaFollette Will Be The Speaker For Monday Night.

CHAUTAUQUA'S STRONG LIST.

Warde, Zueblin and Other Notables Have Been Heard.

The Chautauqua presented some of its best features yesterday. Chas. Zueblin, the publicist of Boston, spoke in the afternoon on civic improvement problems. He is everywhere recognized as one of the ablest advocates of this branch of reform work. His lecture was heard with the greatest interest.

Last night Miss Crum appeared in a novelty program of clay modelings.

The program for to-day has Totten the wonder-working magician. He not only keeps you guessing, but he also keeps you fooled. His work is lightning-like, and he is so dexterous and skillful and rapid in his manipulations that the audience is constantly kept in feverish excitement wondering what will come next. The truth of the matter is that if Totten had lived in the days of witchcraft he would have been sent to the guillotine double-quick. Mr. Totten is mostly assisted by his daughter, Miss Flora Totten, herself a talented young lady possessing rare ability in the mysterious art.

Monday is political day and Senator LaFollette is the strong closing card.

As Governor of Wisconsin he set in motion laws for the public welfare that have become in a large measure patterns for other States. It is claimed that he in a large measure inspired the great work which the University of Wisconsin is doing, the influence of which is being felt by the people. The summer of 1915 will note Mr. LaFollette's first appearance on Southern chautauquas, and the Alkahest is justly proud of the fact that it is under its auspices that Mr. LaFollette will lecture. "LaFollette Day" will be a big day, because Mr. LaFollette is a big man who delivers a big lecture.

To-day's Program.

MORNING.

Address by the Morning Hour Lecturer.

AFTERNOON.

Musical Prelude by the Frank Lea Short Singers. A Program of Magic Mirth and Music, by J. M. Totten and Company.

EVENING.

The Frank Lea Short Players in a complete costumed production of Rostand's "The Romancaers."

MONDAY, MAY 31ST.

MORNING.

Address by the Morning Hour Lecturer.

AFTERNOON.

Concert by the Metropolitan Grand Quartet: Chas. L. Neth, Lyric Tenor; Paul Chase, Robust Tenor; John Eberly, Baritone; and Thos. Wade Lane, Bass, assisted by Mrs. Wilgo Page Lane, Pianiste and Accompaniste.

EVENING.

Prelude by the Metropolitan Grand Quartet. Lecture, "Representative Government," Senator Robt. M. LaFollette, of Wisc.

Salvation Army.

A service will be held at the county jail at 10:30. Rev. Geo. L. Herr, of Louisville, will be present. Sunday School at 2 p. m. A full attendance is desired as Mrs. Vallier wishes to see all of the children at that time. Y. P. L. at 3 p. m. Topic "Pray for all" 1 Tim. 2, 1-6. Evening service at 7:30. Rev. Geo. L. Herr will speak on the subject "Prison Reform." A cordial invitation is extended to the public.

The earth, under a thick covering of snow, is 10 degrees warmer than the air immediately above the snow.

HIGH SCHOOL CLOSES

Next Week With a List of Twenty-Four Graduates.

DEBATE ON TUESDAY NIGHT.

Commencement Exercises On Thursday Night at Union Tabernacle.

The commencement exercises of the City High Schools will be held next week, beginning Tuesday night with the oratorical contest between the Delphic and Ciceronian literary societies. There will be a debate on the question:

Resolved, That Germany's attitude towards the present war was and is justifiable.

Affirmative—Joel Roberts, Livingston Leavell, Tandy Wadlington.

Negative—H. K. Jarrett, James Skerritt, Jas. Higgins.

Wednesday will be class day.

Thursday night the regular graduating exercises will be held. There will be 24 graduates and perhaps more, as the number may be increased by special examinations. All of the exercises will take place at the Tabernacle.

REQUISITION IS HONORED

Sheriff Smith Gone After Man Charged With Murder Here.

Sheriff Jewell Smith on yesterday received the requisition papers in the case of Phenie Averitt, col., detained at Knoxville, Tenn., and he left for Knoxville this morning. Averitt is charged with the murder of Howard Mimms, near Sinking Fork last December. He was arrested in Knoxville a few days ago.

HARMONY LODGE W. O. W.

Organized With 58 Members Tuesday Night.

A new lodge of the Woodmen of the World, to be known as Harmony Lodge No. 506, was organized Wednesday night with 18 new charter members and 39 transferred. J. H. Brewer, State Manager, instituted the lodge and the following officers were elected:

Karl Keach, Consul Com.
Marlow Criss, Past C. C.
Jas. R. Wolfe, Adv. Lieut.
J. Wesley Hubbard, Banker.
A. S. Reeder, Clerk.
Fred Morris, Escort.
Jas. W. Ford, Watchman.
Jas. R. Fears, Sentry.
G. A. Champlin, G. E. Randle and W. R. Stewart, Managers.
Drs. J. P. Keith and J. E. Stone, physicians.

The lodge differed from the old lodge on the club room feature. It will meet every Tuesday night at the Odd Fellows hall.

Home For Birds.

In the city of Oakland, Cal., is a body of salt water called Lake Merritt and the Park Superintendent has on foot a plan to construct in it an artificial island three acres in extent to be planted in trees and made a home for birds, and absolute protection furnished them. The city council has approved the plan.

Binder Twine Contract.

The Forbes Manufacturing Co. has been awarded the contract to furnish binder twine for the Church Hill Grange this season.

Hunter-Blades.

W. D. Hunter and Mrs. Fannie Blades, a couple from Webster county, were married here yesterday by Judge Knight.

LARGE JUNE DOCKET

Nearly 500 Cases For Approaching Term of Circuit Court.

FRIDAY LAST DAY FOR SUITS.

Terms Begins Monday, June 7th, For a Session of Four Weeks.

Yesterday was the last day for filing suits for the June term of Circuit court which convenes June 7. Up to noon there were 130 appearances. There are about 550 continued equities and common law cases, making nearly 500 cases on the docket.

Dock Barnes has filed suit against Howard Wicks for \$1,000 damages. He alleges that defendant falsely and maliciously swore to an affidavit charging the plaintiff with having committed a crime of maliciously shooting him. Plaintiff further states that he was arrested on the charge, tried and acquitted and that the arrest and prosecution caused his confinement in the county jail 92 days.

M. D. Grubbs sues the L. & N. railroad company, charging that the defendant in reconstructing their road bed, was negligent and as a consequence their property, situated a few miles north of the city, overflows. He prays for \$500 damages.

Logan Johns, Mary Wand and Lucilla Booker, trustees of the Society of Shakers at South Union, have filed suit here asking that a receiver be appointed to take charge of the property and affairs of the Terry Coal & Coke Co. Plaintiffs base the action upon representation that they own 33,000 worth of bonds of the Company and other interest in the Corporation, and they state that the mines have not been operated for some time, and that the property is deteriorating in value, and the Court is asked to intervene and appoint someone to take charge and settle up the affairs of the company.

Mrs. Bernice Elkietian, by her mother Mrs. Bannister, instituted divorce proceedings against her husband, Dr. D. H. Elkietian. She also prays for the custody of their eighteen-months-old son and alimony at the rate of \$40 per month. Cruel treatment is alleged.

Mrs. T. H. Moorman, of Backinridge county, filed suit here against the Mutual Life Insurance Company of New York, for \$2,000, which she claims is the amount of a policy in effect on the life of her son, Charles Moorman, who died here several months ago.

J. S. Purley sues W. E. Trahern for \$750 damages, alleging that while he was sitting on a motorcycle at the edge of a sike walk he was run into by defendant, who was driving his auto, and was painfully injured.

BEARD-WEST

Hopkinsville Couple Married in Clarksville Few Days Ago.

Wilburn Beard and Miss Era M. West were married in Clarksville a few days ago. The young people went over in the afternoon and after the ceremony was performed at the Court House they returned home on the train the same night.

The bride is a daughter of Mr. J. H. West and is a saleslady in the store of The J. T. Edwards Co. She is quite pretty and enjoys a wide popularity. Mr. Beard is a popular young mechanic.

Mr. and Mrs. Beard have taken board with Mrs. Wade, corner 14th and Liberty streets.

Osaka is the great Japanese toy-making center, with Tokio next.

BRITISH LOSE 2 BATTLESHIPS

Triumph Torpedoed on Wednesday and Majestic on Thursday.

STEAMERS ARE ALSO SUNK

Austrians and Germans Batter Away At Czar's Forces Near Przemysl.

London, May 28.—The British battleship Majestic, another of the ships supporting the allied army on the Gallipoli peninsula, was sunk by a German submarine yesterday. Nearly all the officers and crew were saved.

At about the same time the steamer Princess Irene, built last year for the Canadian-British Columbia coast survey and which was taken over by the admiralty at the commencement of the war, was destroyed by an accidental explosion while at anchor at Sheerness, where she was undergoing repairs. All her crew numbering about 250, except one seaman, and 78 dock yard workmen, aboard at the time, lost their lives.

The Majestic, which was the oldest battleship on the active list of the British navy, is the sixth capital ship lost by the allies since the beginning of the Dardanelles operations and the second which has fallen a victim to German submarines which recently arrived in these waters.

The submarine menace is a growing one, both in the Aegean sea and home waters, and these vessels promise to take an active part in the operations in the narrow waters of the Adriatic, where, as in the Aegean, islands afford good shelter.

While the warships are able to escape submarines in the waters around the British Isles, the increase in their numbers makes the carrying on of sea-borne trade more and more hazardous.

The admiralty still believes that the American steamer Nebraskan, now on her way to Liverpool, was torpedoed. The British steamer Morwenna, bound for Canada, and the Danish steamer Petty have been sunk by submarines. Only a few days ago the commander of a submarine informed a Danish captain that he had no orders to sink Danish vessels.

Amidst the activities on land and sea and in the air, from the Dardanelles to the waters around the British Isles, middle Galicia remains the scene of the greatest and most important fighting. The Austrians and Germans continue to batter at the Russian lines northeast and southeast of Przemysl, and, according to reports which have not been confirmed by official statements, they have severed communications between the former Austrian fortress and Lemberg.

Despite these claims, Petrograd announces with the greatest optimism the belief that the Russian reinforcements will stem the Austro-German onslaught.

The repulse of the counter attacks and the carrying out of attacks by the allies themselves, have resulted in considerable losses on the allied side, to which must now be added the losses sustained by the sinking of the battleships Triumph and Majestic.

The Italians continue their offensive on the frontiers of Tyrol, the Trentino and Istria, and have taken a chain of important positions, but they have not yet come into contact with the main Austrian forces, which are waiting for them behind entrenchments.

A dispatch to the Times from its Madras correspondent says that 460 men of the crew of 700 of the British battleship Triumph, sunk Wednesday by a submarine in the Gulf of Saros, were saved.

Joseph Thomas Gaines.

Born, May 26, to the wife of Mr. R. U. Gaines, a fine boy, Joseph Thomas Gaines.

Chitchat.

STADELMAN—Nick Stadelman, the meat man, is one citizen of Hopkinsville who has served in the German army as a lieutenant. He is a thoroughly Americanized citizen, but his sympathies are with his fatherland as long as the fighting is on the other side. If there should be war with Germany, Nick would line up with Uncle Sam. He is in correspondence with friends in Germany who scout the idea that Germany can be starved out. He says the prisoners captured are put to work on building roads, guarded by the old men and that all Germany will have good roads for just what the prisoners eat.

WARDE—Mr. Fred Warde, who appeared at the tabernacle Wednesday evening in the presentation of Julius Caesar, is one of the grand old men of the American Stage. He made his first appearance in this country with Edwin Booth in 1876. He played the leading part in Shakespearean drama at Mozart Hall in 1881, Damon at Holland's Opera House in 1881 and a week's engagement at same in 1888.

He and one other member, are the only living Elks who organized the first Elks Lodge in the world.

He was born in England 67 years ago, and Elbert Hubbard, in the Philistine, wrote of him that he is the "grandson of the Lord Nelson and Lady Hamilton," an honor that Mr. Warde does not admit.

He is a charming conversationalist, and has a remarkable memory for names and faces, and his personal acquaintance and reminiscences cover every state in the union.

He presented Julius Caesar by request, at the very last moment, and is equally at home with all of Shakespeare's dramas. His audience was very appreciative of his effort and the people of Hopkinsville will welcome him back with pleasure.

GUIER—Mr. Jas. D. Guier, of Cadiz, a progressive farmer and leader in the County agricultural movement in Trigg county, was in the city Thursday.

GUNN—Miss Lotta Gunn has rented the Wooldridge homestead on the corner of Main and Eighteenth streets and will convert it into a boarding house. She moved into the house yesterday and will be ready for boarders by June 1.

GAINES—Col. L. W. Gaines, of Trenton, candidate for lieutenant governor, was here Thursday and reports his race for the nomination as already won. He has three opponents, but expects to win hands down.

TANDY—Miss Mary Louise Tandy, who was awarded a gold medal for the best record made in scholarship during the session of ten months in Bethel College, is a young lady of exceptional brightness and mental strength. Her father is Mr. M. R. Tandy, of Todd county, over the county line from Fairview, and before coming here, she took a similar honor in the school at Elkton. She was a junior this year and her friends are very proud of the record she has made.

KLEEMAN—Miss Leah Kleeman, editor-in-chief of "The Purple and Gold," the Clarksville High School Journal, has achieved a remarkable record, having never missed a day, or been tardy at school for ten years. Five years ago she was awarded a medal and in graduating this year she was awarded a gold wrist watch. Miss Kleeman is a niece of Mrs. H. M. Frankel and Mr. Ed Kleeman, of this city.

Had to Spell It.

Rev. Don Quixote Smith addressed the young ladies at Bethel College last Sunday.

Ed Radford approached Prof. Peterson Monday and said: "Professor, that was a fine baccalaureate sermon you had yesterday, but I didn't quite catch the gentleman's name. I wish you would spell it for me?" S-m-i-t-h, slowly spelled the professor, while Mr. Radford took on a dry grin that hasn't worn off yet.

SATURDAY, MAY 29

King Victor Emmanuel has assumed supreme command of his army and navy forces, and left incognito for the Italian headquarters.

On Tuesday afternoon lightning struck the County Clerk's office in the Courthouse at Morgantown, and made a large hole in the wall.

Let's have the proof about what Harry McChesney said in Ballard county. Did he advocate the boycotting of newspapers that do not agree with him.

Those strawberries raised by Jim Robertson and mentioned in the last Kentuckian were a trifle too large. They were five inches in circumference instead of five inches in diameter, which makes a difference.

Louisville and Jefferson county were swept by a storm Tuesday afternoon which leveled more than 1,000 trees, seriously injured half a dozen persons and damaged property to the extent of about \$50,000.

The government of the Netherlands has sent a note to Germany protesting against the sinking on May 7 of the Cunarder Lusitania by a German submarine. The contents of the note substantially the same as the American communication on the same subject.

The alleged torpedoing of the American steamship Nebraska, Wednesday off the coast of Ireland is featured by all the London papers, which describe the incident as "another challenge to America." The Nebraska was not disabled and proceeded to port.

Among more than 4,000 letters urging executive clemency for Leo M. Frank received one day by Governor Slaton and the State Prison Commission were communications from United States Senator Sherman, Illinois; Gov. Ferguson, Texas; Circuit Judge G. B. Arnold, St. Louis, and Judge Ben B. Lindsey, Denver.

The Kentuckian may be slow to catch on, but the Dixie Highway seems to be merely a circuitous paper route that joy riders may or may not travel in touring the country in automobiles. Each county is to build a speeding course for the transient tourists and "clear the track" for them inside of twelve months under penalty of having them go some other way. In the meanwhile the U. S. mail for Dixie will go the old way, right through Hopkinsville.

The English have lost another battleship in the Dardanelles. The Triumph, 436 feet long with 700 men was sunk by a submarine Wednesday. Most of the crew were saved. With the sinking of the Triumph 5 allied battleships have been lost in the Dardanelles by Turkish gunfire, mines or torpedoes. Of these losses the British have sustained four—the Triumph, Ocean, Irresistible and Goliath. One French ship has been sunk—the Bouvet. In addition, several other allied battleships have at various times been struck by Turkish shells and forced to retire from the fighting in the waterway.

World's Oldest University.
Founded in the year 973 A. D., the Mohammedan university of El-Azhar ("the Luminous") is the oldest existing university in the world. It is the Oxford of the Moslem world, and is at present attended by upward of 10,000 students of all ages, and from every eastern country, from the Caucasus to Somaliland. Board and lodging is free. The teaching consists chiefly of Mohammedan dogma, which is laboriously committed to memory from sacred books.

DAIRY

TWELVE GOOD SILO REASONS

One Great Obstacle, the Cost, May Be Partly Overcome by Constructing Pit Silos.

Shall I build a silo?

This question is being asked by the more enterprising farmers and ranchmen all over the West.

The cost of the silo is the greatest obstacle, but if this stands seriously in the way a pit may be dug and finished at a cost not exceeding fifty to one hundred dollars for material. Pit silos are very satisfactory and are certainly to be desired rather than to have no silo at all.

Twelve good reasons why the farmer should provide himself with a silo are given by T. B. Woodward of the dairy division, United States department of agriculture, in Farmers' Bulletin No. 556. Every one of them touches some spot of vital importance to the feeder.

1. More feed can be stored in a given space in the form of silage than in the form of fodder or hay.
2. There is a smaller loss of food material when a crop is made into silage than when cured as fodder or hay.
3. Corn silage is a more efficient feed than corn fodder.
4. An acre of corn can be placed in the silo at less cost than the same area can be husked and shredded.
5. Crop can be put in the silo during weather that could not be utilized for making hay or curing fodder.
6. More stock can be kept on a

A Battery of Silos on a Pennsylvania Dairy Farm.

given area of land when silage is the basis of the ration.

7. There is less waste in feeding silage than in feeding fodder. Good silage properly fed is all consumed.
8. Silage is very palatable.
9. Silage, like other succulent feeds, has a beneficial effect upon the digestive organs.
10. Silage is the cheapest and best form in which a succulent feed can be provided for winter use.
11. Silage can be used for supplementing pastures more economically than can soiling crops, because it requires less labor, and silage is more palatable.
12. Converting the corn crop into silage clears the land and leaves it ready for another crop.

Almost anything in the way of forage crops may be put into the silo and will keep until it is needed.

DAIRY NOTES

Abuse generally educates the cow to kick.

Peanuts make a splendid crop on the dairy or hog farm.

A good dairy cow is the most profitable piece of property on the farm.

Keep the cows clean and you will not have so much trouble with stringy milk.

The income of the dairy is the most constant and systematic income of the entire farm.

For dairy cows the temperature of the barn should not fall below 40 degrees or rise above 60 degrees.

The good milkster is the cow that turns the most feed into the largest flow of good, rich, healthful milk.

The young calf's digestion is very easily upset. Be careful that it is rightly fed and kept in clean quarters.

Leave all other work to help a cow that appears to be in trouble, whether it is your cow or your neighbor's.

Carelessness is one of the most common causes of failure on the dairy farm. Look to your work and to the details every day.

Not An Experiment.

Paint Lick, Ky.—Mrs. Mary Freeman, of this place says: "Before I commenced to take Cardui, I suffered so much from womanly trouble, I was so weak that I was down on my back nearly all the time. Cardui has done me more good than any medicine I ever took in my life. I can't possibly praise it too highly." You need not be afraid to take Cardui. It is no new experiment. For fifty years, it has been found to relieve headache, backache, and similar troubles. Composed of gentle-acting, herb, ingredient, Cardui builds up the strength, preventing much unnecessary pain. Try it for your troubles, to-day.—Advertisement.

Descendants of Youthful Unions.

A Chicago man recently offered one hundred dollars for the proofs that any great men have been produced by a family practicing early marriages throughout a century. In other words, he claims that three generations to a hundred years are all that there should be to result in vigorous descendants as a protest against recent medical opinions in favor of youthful marriages which, if constantly carried out from parents to children, would average four generations to a century.

Not the Right House.

It had been a hard day for the book agent. Sales were desperately slow, and as a last resort he decided to try a nearby house despite its shabby appearance. "Have you a Charles Dickens in your home?" he asked politely. "No," she snapped. "Or a Robert Louis Stevenson?" "No," "Or a Walter Scott?" "No, we ain't, an' what's more, we don't run a boarding house here, either. If you're looking for them fellows you might try the house across the street. I understand they keep boarders."

ROADS IN BETTER CONDITION

Split-Log Drag of Great Service in Keeping Thoroughfares in Shape—How It Is Built.

The use of the split-log drag is important in putting the roads in shape. There are over 2,000,000 miles of earth roads in the country, and the split-log drag is of great service in keeping them in economical repair. The drag is used in many states and in foreign countries. It is used with two, three, or four horses, and is easily constructed.

It is a mistake to construct a heavy drag. A dry red cedar log is the best material for a drag. Red elm and walnut when thoroughly dried are excellent, and box elder, soft maple, or even willow are preferable to oak, hickory or ash.

The log should be seven or eight feet long, and from ten to twelve inches in diameter, and carefully split down the middle. The heaviest and best slabs should be selected for the front. At a point on the front slab four inches from the end that is to be at the middle of the road locate the center of the hole to receive a cross stake, and 22 inches from the other end of the front slab locate the center for another cross stake. The hole for the middle stake will lie on a line connecting and halfway between the other two.

The back slab should then be placed in a position behind the other. From the end at the middle of the road measure 20 inches for the center of the cross stake, and six inches from the other end locate the center of the

The Split-Log Drag.

outside stake. Find the center of the middle hole as before. When these holes are brought opposite each other, one end of the back slab will lie 18 inches nearer the center of the roadway than the front one. The holes should be two inches in diameter. Care must be taken to hold the auger plumb in boring these holes in order that the stakes shall fit properly.

The two slabs should be held 36 inches apart by the stakes. The stakes should taper gradually toward the ends. There should be no shoulder at the point where the stakes enter the slab. The stakes should be fastened in place by wedges only. When the stakes have been placed in position and tightly wedged a brace two inches thick and four inches wide should be placed diagonally to them at the ditch end. The brace should be dropped on the front slab, so that its lower edge shall lie within an inch of the ground, while the other end should rest in the angle, between the slab and the end stake. A strip of iron about three and one-half feet long, three or four inches wide, and one-half of an inch thick may be used for the blade.

An ordinary trace chain is strong enough to draw the implement, provided the clevis is not fastened through a link. The chain should be wrapped around the rear stake, then passed over the front slab. Raising the chain at this end of the slab allows the earth to drift past the face of the drag. The other end of the chain should be passed through the hole in the end of the slab.

Make-Up of Dairy Cow.

A wide, deep and full barrel or side is very important in a dairy cow. She must have plenty of room in which to manufacture milk from food and a large barrel indicates large digestive organs. A wide mouth and long, strong jaws also indicate that Bossey is, like Bill Nye, "fond of food." She ought also to have a large belly and moderately high flank.

Beautiful Home Grounds.

Set out fruit trees where they will add to the beauty of the grounds.

INTERNATIONAL HARVESTER MACHINES

For Your Use—This
IHC Mogul Oil Engine

OF all the satisfactory machines that are built for the use of farmers and contractors, this IHC Mogul oil engine is certainly one of the best. Steady as a clock, ready and willing to do its work whenever there is work to do—it is getting a reputation which might be envied by any man.

This engine has the long cylinder and piston, the large bearings and heavy crank shaft, the heavy fly wheels and split hubs, the well designed base, and all the accessories that the engine user expects to find in an IHC engine. In looks it is the aristocrat of the engine world, and its performance is in every way equal to its looks. This is the engine to buy, because of its low cost per year of service.

We have a demonstrating engine on the floor here which you should see. Until you see it, and see it at work, you cannot know as much as you should about oil engines.

THE BATTLE OF THE TIRES

[Agricultural and Commercial Press Service]
It is interesting to watch the forces of civilization battling for supremacy. The struggle now going on between the rubber and the iron tire promises to be the liveliest contest of the Twentieth Century.

The struggle is a silent one and there are no war correspondents to write vivid descriptions of the conflict but the results are more far-reaching to present and future generations than the war of Europe.

The rubber tire has been maneuvering for point of attack for several years and has captured a few unimportant positions in traffic, but it has now pitched a decisive battle with its iron competitor by hurling a million "jittneys" at the street railways and the battle is raging from ocean to ocean. Upon the result of the struggle depends the future of the rubber tire. If it is compelled to retreat, its doom is sealed, but if it wins the battle it will revolutionize the transportation methods of this nation.

If the rubber tire conquers the street traffic its next struggle is with the railroads of the country, and then the greatest battle between economic forces ever fought out on the face of this earth is on, for iron is the undisputed master in transportation, and is fortified behind billions of dollars, and millions of men.

Stephenson applied the steel tire to an iron rail in 1814, but it was 1869 before the golden spike was driven at Promontory Point, which bound the country together with bands of steel. It took the iron tire fifty-five years to creep from ocean to ocean, but the rubber tire while warm from the creative mind of the inventive genius sped across the continent like an arrow shot from the bow of Ulysses. The roadbed was already prepared and therein lies the power of the rubber tire over that of iron, for government builds and maintains the public highway.

But iron is a stubborn metal and it has mastered every wheel that turns; has fought battles with every element above and beneath the earth and has never tasted the wormwood of defeat, and when rubber hurled its full force against this monarch of the Mineral Kingdom, it may rebound to the factory stunned beyond recovery.

The rubber tire first made its appearance on the bicycle, but it proved a frivolous servant and was dismissed for incompetency. It has always been too much inclined to revel in luxury to be taken seriously as a utility machine and its reputation is not one to inspire confidence in heavy traffic performance.

But to those who care to waft into dreamland, it is enchanting to note that there will be a marvelous difference between a rubber and an iron age. The rubber tire will scatter the cities throughout the valleys for with transportation at every man's door, why not? It will traverse the continent with a net work of Macadam highways as beautiful as the boulevard built by Napoleon. It will paralyze the law making bodies of this nation for how could the legislatures run without the railroads to operate on?

FEDERAL INDUSTRIAL COMMISSION

By Peter Radford.

The recent investigation of the United States Commission of Industrial Relations brought together the extremes of society and has given the public an opportunity to view the representatives of distinct classes, side by side, and to study their views in parallel columns.

Capital and labor have always been glaring at each other over gulfs of misunderstanding and if the Federal Industrial Commission attempts to bridge the chasm, it will render the public a distinct service.

The farmer has been sitting on the fence watching capital and labor fight for many years and incidentally furnishing the slivens of war and it is quite gratifying to find them talking with, instead of about, each other. When honest men smile and look into each other's souls, it always makes the world better and far more satisfactory to the farmer, who in the end, bears the burden of conflict, than resolutions, speeches or pamphlets containing charges and counter-charges.

The love for justice makes the whole world kiu. Understanding is an arbiter far more powerful than the mandates of government, for there is no authority quite so commanding as an honest conscience; there is no decree quite so binding as that of the Supreme Court of Common Sense and no sheriff can keep the peace quite so perfect as Understanding.

We suppose the time will never come when capital and labor will not be occasionally blinded by the lightning flashes of avarice or frightened by the thunder peals of discontent. But Understanding is a Prince of Peace that ever holds out the olive branch to men who want to do right. A man's income is always a sacred thing for in it are the hope, ambition and opportunity of himself and family, but there is nothing in a human heart quite so divine as Justice and Understanding is its handmaiden.

Hopkinsville Market Quotations.

Corrected April 24, 1915.

RETAIL GROCERY PRICES.

Country lard, good color and clean 14c and 15c per pound.
Country bacon, 16c per pound.

Opening Ball June 3.

The season will open at Cerulean Springs June 3, with opening ball at night. Dunn's orchestra, of Louisville, engaged for the season.

BAILEY & GRAY,
Proprietors.

Aluminum.

Aluminum cooking utensils are a delight until they turn dark inside—then they are abomination. It is easy, however, to keep them bright. Either wash them in soda and water or boil tomato parings in them; cuttings from rubber and the water it was washed in alone will often do the work. So will lemon and table salt.

Nature Supreme.

Not all the product of artificial greenhouses are so lovely as that of the fields, the country garden, the fence rows, the first roses, the daffodils, the arbutus which hides under the hillside leaves, the first buds of the rhododendrons and the other forms telling of the life blood drawn direct from the earth, while poor man-kind has to take all second hand.

SPECIAL TO WOMEN

The most economical, cleansing and germicidal of all antiseptics is

Paxtine

A soluble Antiseptic Powder to be dissolved in water as needed.

As a medicinal antiseptic for douches in treating catarrh, inflammation or ulceration of nose, throat, and that caused by feminine life it has no equal. For ten years the Lydia E. Pinkham Medicine Co. has recommended Paxtine in their private correspondence with women, which proves its superiority. Women who have been cured say it is "worth its weight in gold." At drugists, 50c. large box, or by mail, The Paxton Toilet Co., Boston, Mass.

FIRE AT CERULEAN.

Witty & Son's Shop And Con-
tents Destroyed By
Flames.

On Wednesday night, May 12, the blacksmith and wagon shop of T. W. Witty & Son, of Cerulean, was destroyed by fire. This was one of the best equipped shops in this section, as they had all the modern machinery for making wagons, buggies and doing all kinds of repair work, and their loss is therefore very heavy. We understand their loss was about \$3,000, which includes their books and all accounts, and they didn't have a dollar's insurance. The building belonged to T. O. Turner, and his loss is about \$300 with no insurance.

Mr. Witty informed us a few days ago that he was satisfied the fire was of incendiary origin, and that they had a pretty good idea who the guilty parties were.—Cadiz Record.

Civilized Warfare.

Rotterdam, May 26 (via London)—The Courant publishes a telegram from Berlin stating that Germany and Italy have agreed neither to intern civilians nor seize their property.

GRUESOME

Is Suggestion Made of Only
Way To Meet the General
Demand For Glycerine.

Chicago, May 25.—Albert Oppenheim, of Marietta, Ohio, a member of the Western Nitroglycerine Manufacturers' Association, in session here, discussing means for increasing the production of glycerine, an essential element in all high explosives, has suggested using the bodies of the horses and men killed on European battlefields to obtain the necessary animal sinews.

It was declared that the war was necessitating the use of so much glycerine that the entire supply in the United States would be exhausted within 90 days.

If the glycerine is entirely used up, speakers said, it will have not only an important effect on the war, but much work, such as the development of oil wells will be stopped.

Members discussed a plan for pooling their interests. "No explosive aside from nitroglycerin has the shattering effect for shooting oil wells," said Mr. Oppenheim.

"In normal times the United States imported from Europe \$10,000,000 worth of crude glycerine annually. This supply has been entirely cut off."

Flag To Be Returned.

Springfield, Ill., May 28.—The Deller bill, providing for the return of a flag of the Eighteenth Confederate regiment of Tennessee, captured by Illinois troops at the battle of Fort Donelson, passed the house 111 to 3. It already has passed the senate.

PRACTICAL SUGGESTIONS ABOUT PLOWING

Plowing in Relation to Drainage.

(By O. M. OLSON.)

The depth at which land should be plowed depends much upon the season of the year, the kind of soil and the physical condition of the subsoil. Fall plowing, except for fall-grown grain, should invariably be deeper than spring plowing, as there is more time for it to become sufficiently settled and compacted. Whenever land is plowed quite deeply, and the climatic conditions do not thoroughly settle the furrows, it should be thoroughly worked before it is planted.

Heavy soils need to be plowed deeper than the lighter types of soils. Such soils usually have quite compact subsoils, and they are benefited by being brought to the surface. It is also a benefit to heavy soils to bury the vegetable matter at a good depth, as this will assist in keeping the subsoil from becoming too compact.

Lighter soils are very much the opposite. Their subsoils are usually not too compact, and it is better to have the vegetable matter mixed with the surface soil. Deep plowing of such soils has a tendency to make them too loose, and care should be taken to thoroughly compact them before they are planted to crops.

Plowing land continuously at the same depth every time has a tendency

to form a hard, compact layer in the subsoil at that depth. This is an undesirable condition, and can usually be avoided by varying the depth slightly from year to year. New land, when first brought under the plow, should not be plowed too deeply. While it may be desirable to ultimately have a furrow six or seven inches in depth, it should be brought about gradually, by plowing a half-inch or so deeper every year.

A method of draining fields which has proved satisfactory and inexpensive, is ridging the land while plowing.

The plow is started in the middle where two furrows are plowed against each other. By turning the horses to the right when making the turns at C and D, the dead furrows will be located at A and B and E and F. By continuing this system a series of years, the ditches are made deeper year by year. No ridge is formed on the sides of the ditch. By commencing to plow in this way, and by varying the back furrows one year a little to the right of C and D, and another year a little to the left, the dead furrows will be made broad rather than deep, making the fields gently undulate instead of being cut up by deep ditches and narrow high ridges.

BEST FARM BUILDINGS

Too Little Thought and Study
Given to Details.

Not Generally Understood That Circular Structure Is Much Stronger Than Rectangular Form—Cost of Material Is Less.

(By W. J. FRAZER.)

The planning, construction, and arrangement of farm buildings do not usually receive the thought and study these subjects warrant. How many dairymen have compared a circular, 40-cow barn with the common rectangular building containing the same area? How many understand that the circular structure is much the stronger; that the rectangular form requires 22 per cent more wall and foundation to enclose the same space; and that the cost of material is from 34 to 58 per cent more for the rectangular building?

In a community in which everyone is engaged in the same occupation, one person is likely to copy from his neighbor without apparently giving a thought as to whether or not there is a better way.

In comparing a 60-foot round barn with a rectangular barn of the same area, the two barns should afford the cows the same amount of space on the platform. Allowing each cow in the 60-foot round barn three feet six inches in width at the rear of the platform, it will accommodate 40 cows and leave space for two passageways. But in a rectangular barn, only three feet four inches of platform space need be allowed for each cow, and the 78½-

Showing How This 60-Foot Barn May Be Arranged to Accommodate 40 Cows in Stalls—To Supply This Sized Herd and the Necessary Young Stock With Silage for Eight Months Would Require a 370-Ton Silo, or One 18 Feet in Diameter and 56 Feet Deep; With a Seven-Foot Feed Alley and a 2½-Foot Manure, the Circle at the Stanchions Would Be 38 Feet in Diameter, or 119.13 Feet in Circumference; Allowing 4½ feet for Two Passage Ways, the Stalls Would Be 2 Feet 10½ inches Wide at the Stanchion, and 3 Feet 6 inches at the Drop.

foot barn, with two three-foot passageways across it for convenience in feeding, will accommodate 43 cows. While the rectangular barn has stall room for 50 more cows, the round barn

contains space in the center for a silo 18 feet in diameter.

Owing to the fact that a silo is a necessity for the most economical production of milk, a barn is not complete for a dairyman's purpose unless it includes a silo with capacity to store sufficient silage for the herd. In the case of the round barn, the silo is the most economically built inside, but in the rectangular form would cause a waste of space, and for that reason is best erected outside. Ther

Arrangement of Cow Stable for Two Rows of Cows Tailed Together—The Barn Is Cleaned by Driving Around Behind the Cows.

fore, in comparing a round dairy barn with a rectangular dairy barn, silo should be included.

The smaller surface on the outside wall of the round barn requires less paint and makes a proportional saving in keeping the round barn painted in after years.

TAKE CARE OF THE MANURE

Shallow Concrete Pit Affords Practical Means of Taking Care of Soil Fertilizer.

The shallow concrete manure pit out of doors is a practical means of taking care of manure and is to be recommended.

Where a manure shed is used it should be so arranged that stock may have free access thereto. In this way the manure will be kept well packed down by the animals tramping over it, and the danger of loss due to burning and excessive fermentation very materially decreased.

Barnyard manure, however, is not a balanced fertilizer for ordinary farm crops; it is relatively high in nitrogen and potash and correspondingly low in phosphorus.

Experiments conducted by the Indiana station show that most clay soils of the state are deficient in that same element, phosphorus. By adding some phosphatic material to the manure as it is produced, we are able, not only to supply the lacking element, phosphorus, but also to fix the nitrogen, to some extent, and thus prevent its escape in the form of ammonia gas.

Maintenance of Sows.

In the maintenance of the brood-sows we have our best opportunity to make use of pasturage, waste feeds, fallen fruits, etc. Not that these things are sufficient, but because roughage, range, bulk, succulence and variety are good for the sows.

Work Together Nicely.

The hog and the dairy cow work nicely together.

MUST REGISTER

Collector Griffith Preparing For
Rush of Business During
Next Month.

Preparations are being made by Josh T. Griffith, collector of internal revenue, and his force for the heavy business expected in June. Under the law all persons paying a special tax to the government must register between June 1 and 30, and as recent legislation has increased the number of such persons in this district without increasing the force employed to handle the business, the collector's deputies will have a busy month.

Special taxes are paid by liquor dealers, both wholesale and retail; druggists, physicians, veterinarians, tobacco dealers and manufacturers, oleomargarine dealers, manufacturers and others. A 50-cent penalty is automatically attached to those who fail to register within the required time, and in the case of the Harrison antineurotic act a penalty of fine and imprisonment is provided for those who have in their possession opium or its derivatives without having complied with the law.—Owensboro Messenger.

NOTICE

Your Sanitary assessment for June, July and August, is due June 1st, payable at my office. Please pay same promptly and save penalty.

W. R. CRAWLEY,
Sanitary Officer.

Harris Held Over.

Dottie Harris, of Providence, Ky., charged with counterfeiting, had his examining trial before Commissioner Clark and was held over to Federal court. Bond was fixed at \$1,000, and failing to furnish same, he was taken to jail at Owensboro.

BUSINESS MEN

Of Pembroke Meet And Organ-
ize a Commercial
Club.

The business men of Pembroke organized a Commercial Club this week which starts out with 35 members. An organization was effected by the election of the following officers:

R. Ross Wood, President.
Geo. Mimms, Vice-President.
Eugene Kelley, Vice-President.
C. R. Hancock, Secretary.
O. E. Layne, Treasurer.

A committee on by-laws was appointed, consisting of Messrs. Douglas Graham, D. L. Lander, Eldon Crutchfield and Eugene Kelley.

Another meeting will be held next Monday night at 8 o'clock. The Bank of Pembroke, through Cashier Graham, proffered a room in the bank building as a permanent meeting place and this was accepted. All future meetings will be held in this room.—Journal.

Webb-Cross.

Miss Lila Cross, of Pembroke, and Mr. Wallace Webb, of Trenton were married in Clarksville Thursday at 3:00 p. m. by the Rev. Ward Russell, pastor of the Christian church, Trenton. They were accompanied by Messrs. Jesse Townley and Mose Lacy and Misses Ruth Williams, Naomi Oliver and Kathryn Cross, of Pembroke, and several young people from Trenton, the party making the trip in automobiles.

The bride is the attractive daughter of Mr. and Mrs. J. W. Cross and the groom is a prosperous young farmer of Todd county. They returned the same day and will be at home on the groom's farm near Trenton.

Amos-Wright.

David H. Amos, of Oakland, and Miss Sarah M. Wright, of Smith's Grove, were married Tuesday.

Clark's MARKET HOUSE.

Business Talk---Crop Condition

Too much rain or a drouth, no plants or plants too large to set, every year we have our ups and downs on the farm—yet for the last 15 years we have never failed to raise a crop in Christian county. If we fail in one crop we have far above the average in other crops. We of course would love to see a full crop of every kind, but let's be satisfied with what we have and quit grumbling, we are as much better off than over half of the States.

WAR! WAR! when we want some excuse for not doing business we cry out War and unsettled conditions. We have had unsettled conditions in the business world for the past 100 years—let's all put our shoulders to the wheel and keep on hustling, things will come around all right.

Come and see whether we live up to what we talk—we have increased our big stock, 4 Car Loads of Salt are beginning to come in. Another Car Load of Sugar has been shipped to us to arrive in a few days.

Fruit Jars have come in. Ice Cream Freezers in abundance. Big purchases of Flour.

MEAT—Thousands of pounds of all kinds of meat and lard on hand, 40 thousand people to feed in Christian county. 12 thousand in Hopkinsville and its suburbs, to eat 3 times a day. We have the stock and we want to help to feed them.

Let every Farmer in Christian county come to the Big Farm rally on June 3rd, meet each other, come with a smile and go back home with renewed grit and determination to overcome all obstacles and keep Christian county at the head of all the good solid substantial Booster Counties in the State.

Come to see us when in the City.

TRIGG ITEMS.

(Critic Record.)

Mr. Lafe Lester was stricken with apoplexy early yesterday morning at his home in this city. The right side is badly paralyzed, and he has been in an unconscious condition since stricken. Mr. Lester is about sixty-six years of age and has not been in good health lately. He may linger for a time, but there is little hope of his recovery.

Miss Dorothy Macdonald, the younger daughter of Prof. H. A. Macdonald, of Morganfield, was operated on last Tuesday evening at the Walker Infirmary at Evansville for appendicitis. She stood the operation well; and at last report there was hope of her recovery, though still in a very critical condition.

George Cherry, a young man who has lived for many years at the home of Mrs. Jane Cain, several miles north-west of Cadiz, lost his life by drowning in Little river on Wednesday afternoon of last week.

Herbert Roake, formerly of Cadiz but now of Clarksville, was operated upon in Nashville a few days ago, but is now getting along nicely. The nature of the operation was quite serious.

Mr. J. R. Blakely, of Cerulean, who suffered a paralytic stroke several months ago and whose condition has been considered quite serious during the past several days, was reported some better yesterday afternoon.

Universalist Church.

Services at the Universalist church tomorrow at 7:30 p. m. Subject: "Following Jesus."

J. B. FOSHER,
Pastor.

Philadelphia jitney men have organized to prohibit "joyriding."

Inventions.

It has been a long time since a perpetual motion machine was invented. They used to come oftener and with more regularity and enjoy a certain kind of notoriety for a day.

But the inventor has made his appearance again, and as usual the only thing he needs is a little ready money. It is doubtful if his invention will ever enjoy the experience of a full complete investigation with that condition to be fulfilled.

However, laymen and scientists no longer draw the line where invention stops and the impossible begins. There is concededly no dividing line.

A few years ago scientists laughed at the prospect of a heavier than air flying machine, and there are thousands of them to-day performing a utilitarian part in modern warfare. Not long ago there was no such thing as an undersea craft, and even now, under the rules of international warfare no provision is made for submarines.

The hand grenades are thrown from the trenches and bombs loaded with spears dropped from overhead craft on troops every day. Less than a few months ago no one ever heard of a bomb loaded with gases which, when thrown according to directions, would kill those within a given radius with its deadly fumes.

The vainest fights of the imagination have been excelled in the emergency of war, and the pressing demands of peace are no less insistent.

Mud Roads For Hopkins.

Madisonville, Ky., May 26.—The election called for June 5 on the \$300,000 bond issue for good roads was called off Tuesday afternoon and no efforts will be made now to hold an election before next year.

Strong opposition to the bond issue had developed in the rural districts and it was a foregone conclusion, it appeared that the issue would be defeated overwhelmingly had the election been held. The matter will be taken up later by the promoters.

DEATH OF FARMER**James H. Jones Passes Away
After Long Illness.**

James H. Jones, a well-known farmer of the Carl neighborhood, died Tuesday of a complication of diseases. He was 63 years old. His wife and several children survive. Mr. Jones was a member of the Baptist church and was a much esteemed citizen. The interment took place at Dogwood Wednesday.

American "Gas Bombs."

Americans who have condemned the use of poisonous gases by the Germans are likely to receive with mingled emotions the news that the United States government is conducting a series of experiments at Fort Sheridan, with a chemical bomb invented by Dr. L. R. Fowler; that the purpose of the bomb is to cause instantaneous death through the rapid diffusion of gaseous poisons, and that the government is thinking of adopting it if the tests demonstrate its success. It is further reported that the chemists of the war department have been working for a year to perfect such a bomb.

It will be recalled that at the last Hague conference the representatives of the United States refused to join in a prohibition of poisonous gases as weapons of war, declaring that as asphyxiation was no more inhuman than mutilation, and that gas bombs might really prove to be more merciful than shrapnel as agents of death.

Dr. Fowler, however, makes no such argument. He aims, he says to eliminate war "making war so deadly that men will recoil from it in horror." Yet all the inventors of new modes and implements of slaughter have professed the same laudable purpose.

In view of the unfavorable impression created in this country by the German use of the deadly gases, there may be public protests against our government sanctioning the practice. It is possible, however, that all the belligerents will soon have adopted the new weapon, in which case we should be obliged, in self-defense, to do likewise.

The general criticism leveled at Germany by enemies and neutrals, has not been based so much on the principle of using asphyxiating gas, as on the fact that the belligerents had agreed not to use it, and that Germany, in doing so, was breaking faith and taking an unfair advantage.—Owensboro Messenger.

Big Blow at Henderson.

Henderson, Ky., May 26.—A cyclone struck this city yesterday afternoon shortly after 3 o'clock, unroofing buildings, uprooting trees, taking tops from chimneys and doing damage to the extent of several thousand dollars. The Henderson courthouse was damaged by the storm, as was the Episcopal church, a residence in the north part of the city was struck by lightning, and it was nearly a total loss.

More than five marriages are not permitted one person in Russia, and 30 years is the marriageable limit.

Three years ago the population of the world was 1,630,000,000 persons.

**TERRY COAL &
COKE COMPANY
PROPERTY SOLD**

NOTICE is hereby given to the Stockholders, Bond Holders and Creditors of the TERRY COAL & COKE COMPANY, that an Intention Sale Contract of its MINES and PROPERTY at MANINGTON, KY., was made on the 30th day of March 1915. The property is to be paid for in CASH, on or before the 10th day of August 1915. Under the Contract entered into with the purchaser, all Stockholders are protected for 20 years, with a special contract whereby they can buy their Coal at the mines, under the same terms, and at the same price, given them under their Stockholders Contract with the TERRY COAL & COKE COMPANY, carrying out the Order made at the last general Stockholders Meeting, by unanimous vote of the Stockholders and Bond Holders of the Company, authorizing, and directing the Officers of the Company to make sale of the property of the Company at as early date as possible, and settle up the business affairs of the Company. The Purchasers have furnished the money since that date with which to employ a competent man to keep the water pumped out of the Mines and take care of the Machinery at the mines, and are under contract to do so up to and including the month of August 1915, covering the time they are to take over the property and pay for it.

The price for which the property is contracted is sufficient to pay the Bond Holders in full, and effect a settlement with the creditors upon terms and conditions already entered into with Attorneys of the company by all the principal creditors of the Company. If the above sale contract is consummated it is the best one we have ever been able to make for the Property, and we trust will be satisfactory to all concerned.

Yours respectfully,

TERRY COAL & COKE COMPANY,
Incorporated.By R. E. COOPER, Pres.
L. HAYDON, Sec'y.

May 28, 1915.

Westland-Crook.

A marriage license has been issued to Alvin Westland, of Hamden, Mo., and Miss Laura K. Crook, of this county.

Methodist Church.

Voluntary subscriptions are quietly coming in on the new church. There has been so far no canvass made, but the matter is kept before the congregation and the responses are very encouraging.

During the next week the probability is that the architect will be selected and the plans decided upon, which will be followed by a whirlwind campaign in the near future.

Dr. Powell will preach at 10:15 a. m. on "Lovers and Lifers, or Contrast the two classes of people in every Community." At 7:30 p. m. he will preach on "How Men Make Light of the Gospel." Sunday School at 9:30 a. m. and J. H. Cate, the superintendent wants 525 present at the top of the bell. Epworth League at 6:30 p. m. Strangers and visitors specially invited and everybody welcomed.

Fighting In Last Ditch.

The Scott county local option election contest case will be taken to the United States Supreme Court.

After the Court of Appeals refused a rehearing of its decision holding the dry election of last September valid, the wets sued out a writ of error, thus preventing a mandate being issued putting the judgment into execution.

TRUE GALLANTRY.

"Say, you don't know how to argue. You wouldn't climb apple trees for peaches, would you?"
"I might, if the 'peaches' asked me."

THE ACID TEST.

"What is the acid test of affection?"
"A willingness to eat any kind of salad that a woman likes."

COMMON OCCURRENCE.

"My husband had part of his speech cut out yesterday."
"Who was the operator?"
"Our telephone girl."

THE REASON.

"You can always air a baseball matter."
"No wonder; there are so many fans going about it."

QUITE SO.

"There is a great deal of excitement over this bank fight."
"Yes; they're raising quite a McAdoo about it."

PURELY PERSONAL

Mrs. W. B. Weeks has returned from a visit to friends in Paducah.

Mrs. J. M. Boyd is visiting her mother, Mrs. Evelin Clayton, in Paducah.

Miss Elizabeth McGee has returned from a visit to Mrs. Walter Faulkner, at Marion. She was accompanied home by Mrs. Faulkner, who will spend a week with her daughter, Mrs. Albert Lindsay, and sister, Mrs. T. D. McGee.

Noblin Rozzell, of Memphis, visited his father, Dr. M. W. Rozzell, this week.

Rev. A. R. Kasey, of Elizabethtown, spent Thursday in the city.

Harry Ware, who has been working in the Blue Grass region, has returned to the city.

Tom Smith leaves today for Richmond, Va. and the East, where he will spend his vacation.

Dudley Tichenor, of Eddyville, is in the city.

Miss Rebecca Gaither will leave Monday for Richmond, Va. to attend the Confederate Reunion.

Misses Susan Bible, Evelyn Smith and Mary Hayes are among the graduates of Randolph-Macon College at the ensuing commencement.

Miss Nora Ledford, of Pembroke, was in the city Thursday.

Henderson Man Missing.

Henderson, Ky., May 25.—Relatives and friends of William H. Compton, prominent insurance man, fear that he has met with foul play. He left home two weeks ago and was last seen in Evansville. His wife is almost distracted over his absence. The matter was kept secret by the family, who hoped to locate him. He is said to have had a large sum of money when he left home. Officers at Evansville have found no trace of him.

Jared Hawkins' Will.

The will of the late Jared Hawkins was probated Thursday. He left all his property to his wife during her life, and directed that at her death the property be sold and divided equally between his two children and Ned Turner, J. T. Whitney and C. W. Mertweiller are named as executors.

The annual gasoline demand of the United Kingdom is 460,000,000 gallons.

EXPERT ADVISER ON DRESS

Woman Has Achieved Success in Oc-
cupation That Is Something of
a Novelty.

I heard lately of a plan adopted by
one young woman that has worked out
well with her, and might be of use to
someone else, says a writer in the
Pittsburgh Dispatch. She lives at
home, but must help the family exche-
quer, and this is how she does it:

Her one talent lay in her good taste
in dress. She had an instinctive feel-
ing for what was becoming, not only
for herself but her friends, and was
often called in to consult over a pro-
spective new gown. So that is what
she determined to do professionally.
She let her friends know that for a
certain sum she would give advice on
costumes, helping to arrange a whole
wardrobe, and from friends she soon
branched out to regular clients.

She goes to the house of her em-
ployer and looks over everything the
lady has. She gives definite instruc-
tions as to what each dress or suit or
waist requires to bring it up to par.
She advises as to the most becoming
styles and colors, and lists what new
garments are necessary. Of course she
regulates the expenditure according to
the purses of her various clients.

She has made a success. Many wom-
en do not know what to wear, what
suits them best, what to put together.
She tells them. She also saves them
a good deal by her cleverness in adapt-
ing what looks hopeless. She can also
tell where you should go for mate-
rials; she has addresses of tailors,
dressmakers and sewing women, and
knows they can do what they promise.
She is thoroughly up in her chosen
job, in fact. She also makes a point
of attending carefully to the details
of a costume, making sure that each
item will harmonize. The work is ex-
tremely interesting, and it pays both
her and her clients.

EXPLAINING THE WILD MAN

Curious Individual Learns All About
Him, Including Reason for His
Wildness.

"The wonder-ful curi-ous-tee which
you see before you, lay-dees and gen-
tle-men," announced the sidishow lec-
turer, in tones admirably adapted for
talking down from a great attitude to
the subnormal understandings of the
masses, at the same time waving an
indicatory hand toward the hyperpes-
simistic looking personage in the steel
barred cage, "is the Wild man of the
Everglades, captured at the cost of
seven lives and eleven thousand dol-
lars in gold! Thu-ree times a day this
savage mon-ster leaps upon gur-
reat hunks of r-r-r-aw and r-r-r-reeking
flesh and devours them with terrible
ferocity and bloodcurdling yells!"

"What caused the cuss to go wild
and live on raw meat?" asked a sharp-
nosed ruralist, interestedly.

"He lived on his brother-in-law for
five years and it made him wild when
his long suffering relative would no
longer support him. He eats his meals
raw because he is too lazy to cook
them himself."—Kansas City Star

Changing Diet of the Chinese.

Americans who have been influ-
enced by the Orient to the extent of
taking their tea clear, without milk
or sugar will be astonished to learn
that the Occident is now bent on
teaching the Chinese to use milk with
their decoction of tea leaves—and con-
densed milk at that.

An enterprising condensed milk
company is pushing the campaign and
expects to be successful. This con-
cern has already introduced con-
densed milk ice cream to the Chinese,
and they like it so well that many
of the restaurants keep it always on
hand.

Practically no fresh milk is to be
had in China, although the natives
seem familiar enough with the virtues
of both the fresh and the condensed
article.

Perhaps after all of the Orientals
have taken their tea clear because
there was no milk to put in it and
not because they thought the addition
of milk ruined the beverage.

New Uses for Old Rope.

'Old rope, like old tin cans and
other things generally considered as
waste, has its special market and uses,
and in every senport the collecting
and classifying of old rope is an im-
portant business. Rope that is cov-
ered with heavy graphite or tar is
even more valuable today for making
oakum than lightly tarred material.
While hemp rope with the original
heavy coating of tar worn off by
weathering is often used for bag pa-
per. A small percentage of untarred
hemp rope, used in its prime for hoist-
ing and other purposes, is being con-
verted into cigaret paper in Europe.
Scraps and waste from old tarred
rope, and also old oakum removed
from seams of ships, are now used for
making boards.

Bamboo Blooms Slowly.

Certain species of bamboos flower
only once in about fifty-five years, and
strangely enough, all the trees in a
locality flower about the same time.
Those in Burma began flowering last
year, and now they are all in blossom.
The last time this species flowered
was in 1859-60. They will now die
and those that spring from the seeds
born of this flowering will take their
places and will not flower until about
1870. They may flower sporadically
at other times, but the seed does not
mature, for the bamboo cannot fertil-
ize itself.

Terrible Picture of Suffering.

Clinton, Ky.—Mrs. M. C. McElroy
in a letter from Clinton, writes:
"For six years I was a sufferer from
female troubles. I could not eat, and
could not stand on my feet, with-
out suffering great pain. Three of the
best doctors in the state said I was
in a critical condition, and going
down hill. I lost hope. After using
Cardui a week I began to improve.
Now I feel better than in six years."
Fifty years of success, in actual
practice, is positive proof that Car-
dual can always be relied on, for re-
lieving female weakness and disease.
Why not test it for yourself? Sold
by all druggists.—Advertisement.

ANNOUNCEMENTS.

The Kentuckian is authorized to
announce

HON. JOHN C. DUFFY,
of Christian county, as a candidate
for the Democratic nomination for
Attorney General, subject to the ac-
tion of the August primary election.

We are authorized to announce
HON. A. O. STANLEY,
a candidate for the Democratic nom-
ination for Governor, subject to the
action of the primary August 7th,
1915.

We are authorized to announce
HON. HENRY M. BOSWORTH
of Fayette county, as a candidate
for the Democratic nomination for
Governor of Kentucky, subject to
the primary election August 1915.

We are authorized to announce
HON. JAMES B. ALLENSWORTH
of Christian county, as a candidate
for the Democratic nomination for
Commonwealth's Attorney, for the
Third Judicial district, composed of
Christian, Calloway, Trigg and Lyon
counties.

We are authorized to announce
HON. DENNY P. SMITH,
of Trigg county, a candidate for re-
election as Commonwealth's Attor-
ney of the Third Judicial District of
Kentucky, subject to the action of
the Democratic party at the primary
election, Saturday, August 7th, 1915.

We are authorized to announce
CLAUDE R. CLARK
as a candidate for the Republican
nomination for Clerk of the Chris-
tian County Circuit Court. Primary
August 7, 1915.

We are authorized to announce
JUDGE GUS THOMAS
of Graves county as a candidate for
the Democratic nomination for judge
of the Court of Appeals from the
First district, subject to the Demo-
cratic primary election Aug. 7, 1915.

JUDGE J. T. HANBERY,
of Christian county, as a candidate
for re-election as Judge of the Third
Judicial District of Kentucky, sub-
ject to the action of the Democratic
primary election Aug. 7, 1915.

We are authorized to announce
HON. THOS. S. RHEA
as a candidate for the Democratic
nomination for Auditor of Public
Accounts, subject to the primary
August 7, 1915.

Unusual Offer To Our Readers.

For a limited time, and subject to
withdrawal after 30 days, the well-
known publishing house of the J. B.
Lippincott Company, Philadelphia
founded in 1792, offers to the readers
of this paper a 12 months' subscrip-
tion to "Lippincott's Magazine" and
a year's subscription to the Kentuck-
ian, both for \$3.00. This is the price
of a twelve months' subscription to
"Lippincott's" alone. Additional to
obtaining every issue of this paper
for a year, our readers will receive
in "Lippincott's," 12 great complete
novels by popular authors, 105 short
stories, crisp, entertaining, original
45 timely articles from the pens of
masters, and each month some ex-
cellent poems with the right senti-
ment, and "Walnuts and Wipe,"
the most popular humor section in
America. To obtain this extraordi-
nary offer prompt action is necessary.
Remit to J. B. Lippincott Company,
Washington Square, Phila., Pa.

Africa.

The Church of Scotland has 1,800
ministers.

WELL TO ABSTAIN FROM FOOD

Giving Stomach an Occasional Rest Is
Regarded as an Excellent
Idea.

Abstinence from food for a short
period is a very excellent method of
treatment for dyspepsia and kindred
digestive disturbances. A raging sick
headache disappears after giving the
stomach a rest—by omitting to eat
only one or two meals. It is common
knowledge that a day or two of starv-
ing every two or three months en-
ables one to do better work—more
mental and physical work can be ac-
complished without fatigue. It is ad-
visable, however, when on a hunger
strike to drink water. Copious liba-
tions of hot water—several quarts dur-
ing the waking hours—will contrib-
ute to the feeling of well-being. The
water may be taken a tumblerful or
more every hour or two. Those per-
sons who eat at irregular hours and
partake of foods poorly cooked or of
such composition as to cause indi-
gestion will find the mild form of
starving for 24 hours or longer a prac-
tice worthy of trial, for the resulting
effects of the experiment will be
gratifying. The rest (when one is on
a hunger strike) given the digestive
apparatus strengthens it and thus aids
in conserving the health. A general
feeling of rejuvenation invariably fol-
lows a few days' fasting.

Common Humanity.

Olympian Joves do not ride on
clouds or sit on mountain tops in
these days thundering commands to
common mortals. Or if they do, busy
folk pay little attention to them. Owls
that simply sit and blink and look un-
utterably wise do not fool many peo-
ple.

He who never unbends to speak the
simple language of the home and the
fields, or hold occasional honest con-
verse with his fellows, may be a truly
great and dignified personage. He
may indeed deserve and gain a wide
respect by sheer force of intellect, per-
haps, but we love to feel the quickening
power of that divine spark we call
common humanity that links mind to
mind and heart to heart; that makes
us comrades in a common cause. That
is the thing really worth while. With-
out it all is "cold storage," void of
the spirit that stands for the sunlight
for God's good earth and the brother-
hood of man.—Breder's Gazette.

Victoria's V. C.'s.

In presenting the Victoria Cross to
soldiers actually "in the field," King
George may to some extent have been
influenced by the original order, which
provided that under conditions stipu-
lated, the coveted decoration shall be
conferred "on the spot where the act
to be rewarded by the grant of such
decoration has been performed." The
first presentation of the Victoria Cross,
however, took place in Hyde Park in
June, 1857, when Queen Victoria with
her own hands pinned it on the coats
of sixty-two Crimean heroes. It is re-
corded that the queen wore a red and
white feather at the side of her round
hat, "a scarlet body made nearly like
a military tunic," and a dark blue
skirt. She was on horseback, with
Prince Albert on her left, who made a
profound obeisance to each wearer of
the V. C.

Pigeons That Swim.

The swimming of blue pigeons—the
familiar domestic bird—is the re-
markable sight reported to a Dutch
natural history journal. Some months
ago one of the doves was thrown into
the water in a fight and rescued by hu-
man aid, and since then they have be-
come more familiar with the water.
Pieces of bread noticed in shallow
places evidently tempted them at first.
Gaining courage, they soon learned to
swim, and just before making his re-
port the observer saw two of them
sailing around like gulls a few yards
from his house. When tired of the
bath they quietly flew out of
the water.

CHLORINE

Is the Asphyxiating Gas Used By the Germans.

The asphyxiating gas used by the Germans is chlorine gas affirms Sir James Dewar, president of the Royal Institution. His words, quoted in the New York World from the London Daily Chronicle are as follows: "For some years Germany has been manufacturing chlorine in tremendous quantities. The Germans undoubtedly have hundreds of tons available. If several tons of liquid are allowed to escape into the atmosphere, where it immediately evaporates and forms a yellow gas, and if the wind is blowing in a favorable direction, it is the easiest thing for the Germans to inundate the country with poison for miles ahead of them."

The fact that gas is three times heavier than air makes escape from its disastrous effects almost impossible, for it drifts like a thick fog-cloud along the surface of the ground overwhelming all whom it overtakes."

That the gas has proved effective seems certain, at least a partial success is evident from the French and British official communications telling of the fighting north of Ypres in Flanders on April 22. The French communique simply tells the fact; "The Germans, by employing

large quantities of asphyxiating bombs, the effect of which was felt for a distance of two kilometers (12 miles) behind our lines, forced us to retire in the direction of the Yser Canal."

Sir John French explains that during the bombardment preceding an attack upon the French troops on the British left the Germans made use "of a number of appliances for the production of asphyxiating gas." He continues:

"The quantity produced indicates long and deliberate preparations for the employment of devices contrary to the terms of the Hague convention, to which the enemy subscribed."

"The false statement made by the Germans a week ago to the effect that we were using such gases is now explained. It was obviously an effort to diminish neutral criticism in advance."

A vivid account of the fighting on the 22d, written by a member of the Canadian contingent, appears in the London Times: Part of it gives the impression made upon an eye-witness by this new terror of war. He says:

"The strong northeast wind, which was blowing from the enemy's lines across the French trenches, became charged with a sickening, suffocating odor which was recognized as proceeding from some kind of poisonous gas. The smoke moved like a vivid green wall some four feet in height for several hundred yards, extending to within 200 yards of the ex-

treme left of our lines. Gradually it rose higher and obscured the view from the level."

"Soon strange cries were heard, and through the green mist now growing thinner and patchy, there came a mass of dazed, reeling men, who fell as they passed through our ranks. The greater number were wounded, but they bore upon their faces the marks of agony."

"The retreating men were among the first soldiers of the world, whose sagacity and courage have been proverbial throughout the war. All were reeling through us and around us like drunken men."

Everything, writes Will Irwin from Boulogne to the New York Tribune, "indicates long and thorough preparation for this attack."

"The work of sending out the vapor was done from the advanced German trenches. Men garbed in a dress resembling the harness of a driver and armed with retorts of generators about three feet high and connected with ordinary hose pipe turned the vapor loose toward the French lines. Some witnesses maintain that the Germans sprayed the earth before the trenches with a fluid which, being ignited, sent up the fumes. The German troops, who follow up this advantage with a direct attack, held inspirators in their mouths, thus preventing them from being overcome by the fumes."

"In addition to this, the Germans appear to have fired ordinary explo-

sive shells loaded with some chemical which had a paralyzing effect on all the men in the region of the explosion. Some chemical in the composition of these shells produced violent watering of the eyes, so that the men overcome by them were practically blinded for some hours."

"The effect of the noxious trench gas seems to be slow in wearing away. The men come out of their violent nausea in a state of utter collapse. Some of rescued have already died from the after-effects. How many of the men left unconscious in the trenches when the French broke died from the fumes it is impossible to say, since those trenches were at once occupied by the Germans."

Paris dispatches tell of French soldiers from Ypres, who, in addition to gunshot wounds, were suffering from inflamed bronchial tubes and swollen eyes from the poisonous fumes. But physicians are said to believe that those who are not stifled to death by the fumes suffer no permanent harm."

Lost Cameo.

LOST, a large oval pink Cameo pin, with plain gold band. About size of a silver dollar. Return to Mrs. Millard Bartley.

Gape Extractors.

Call at Kentuckian office for extractors for removing chicken gapes. 10 cents each.

AT THE CHURCHES.

Strangers in the city and the public are cordially invited to all services at the following churches:

Cumberland Presbyterian Church—J. B. Eshman, Pastor. Sunday School at 9:30. Preaching at 11 a. m. Christian Endeavor 6:30. Preaching at 7:30 p. m.

First Baptist Church—Rev. C. M. Thompson, Pastor. Services as usual. Sunday School—9:30 a. m. Morning Service—11:00 a. m. Evening Service—7:30 p. m.

Second Baptist Church—Rev. W. R. Goodman, Pastor. Sunday School—9:45 a. m. Preaching—11 a. m. Preaching—7:00 p. m. Prayer meeting every Wednesday night—7:00 p. m.

Methodist Episcopal Church—Rev. Lewis Powell, Pastor. Sunday School—9:30 a. m. Morning Service—10:45 a. m. Epworth League—6:00 p. m. Evening Service—7:30 p. m. Prayer meeting at 7:30 p. m. every Wednesday.

Westminster Presbyterian Church—Rev. C. H. H. Branch, Pastor. Sunday School—9:30 a. m. Men's Bible Class—10:00 a. m. Morning Service—11:45 a. m. Evening Service—7:30 p. m.

First Presbyterian Church—Elmer Gathard, Pastor. Sunday School—9:30 a. m.

Morning Service 11:00 a. m. Evening Service 7:30. Christian Endeavor—6:45 p. m. Weekly Prayer Meeting—Wednesday—7:30 p. m.

Grace Church—Rev. Geo. C. Abbott, Rector. Morning prayer and sermon at 10:45. Sunday School at 9:30 a. m. Vestry Tuesday at 4:30.

Christian Science Society.—Services, Sunday 11 a. m. Wednesday 7 p. m., Reading Room, Monday, Thursday and Saturday 2, to 4 p. m. All are cordially invited to attend.

We Grind Our Own Lenses

We have just put in a complete Lens Grinding Plant and can save you money on Glasses. Broken Lenses duplicated while you wait. YOUR EYES TESTED and Glasses accurately fitted. We guarantee Satisfaction.
